The healthcare industry is growing fast – and healthcare organizations need managers with the skills, knowledge, and practical experience necessary to keep pace with industry trends. You can meet this need and excel in a thriving industry with a degree in health care management from American National University Online.

You will become competent in healthcare management, finance, policies and procedures, as well as relevant legal and regulatory issues. Equally important, you’ll also develop the analytical, conceptual, and problem-solving skills that are essential for success in a demanding and rapidly evolving healthcare environment. From healthcare administration to health services management, this degree program will prepare you for numerous career opportunities in this dynamic and rewarding field.

AN EDUCATION FOR THE REAL WORLD

Our instructors are experienced healthcare, business management and IT professionals with public and private sector experience who are committed to your academic and career success. They blend academic theory with firsthand knowledge to enrich your learning experience to broaden your perspectives on the latest issues and best practices. Your instructors will guide you through your coursework and mentor you as you develop a successful career path.

IS THIS RIGHT FOR YOU?

“I loved attending ANU. The instructors are great!

This program offered me the opportunity to compete in this high-tech world—so different than what I was used to!”

Pam Williams
Health Information Management Program graduate

JOBS GROWTH FOR MEDICAL AND SERVICE MANAGERS

Between 2010 and 2020, employment of medical and health service managers is expected to grow at a rate of 22%*

“The teachers...they have a lot of experience, because they have been in the [field] for a long time. The books helped, but their experience made us understand better.”

Joanna Reyes
Health Information Management Program graduate
